Daly-West Firm-May Day in Good Demand-Dexter Very Weak-Yankee Strong.

Communication of the same of

TODAY'S METALS:

SILVER 61%

LEAD, \$4.00 CASTING COPPER 15%

The largest day's business of the present month was transacted on the exchange today when 8,750 shares of stock was sold for \$13,911.50. The trading was principally done in medium and high priced stocks. Daly-West was very active at prices ranging between \$16.54 and \$16.60. Altogther about 550 shares changed hands during the call.

May Day was also very active and in spite of the fact that 2,500 shares were thrown on the market the stock closed quite firm. The first sale was made at 95 from which price the stock declined to 94, but afterwards reacted

Mercur was also active at \$5.50, while Valeo made sales as low as 28,

Lower Mammoth failed to hold its own in spite of the reported gold strike, selling down to 54%.

Mammoth sold at better than \$2.09,

while Ajax was loosened up on a bid of 50 and Dexter was released for the modest price of 64 cents per share. Yankee Consolidated let go several

thousand shares at 10. Closing quotations were posted as fol-

# FROM THE HUMBUC

Best Day's Business This Month | Two Cars of Ore on the Market Which Will Bring Over \$8,000.

STRIKE IN MYSTIC SHRINE.

E. S. Hubbard Writes from Nome-Conditions at the Rising Sun-The Wake-Up-Jim Group.

The famous Humbug property in Tintic is putting on new life, judging by the shipments coming to market. Four cars of ore in a month, of a total value of \$16,000, is not a bad record. Uncle Jesse Knight, its fortunate owner, was in town today looking after the sampling of another 2-car shipment of sampling of another 2-car shipment of high grade silver ore from this producer, which makes four cars in the past month. The Humbug is sending out more than it has for the past eighteen months," said Uncle Jesse today. The car that was marketed before the last one netted him over \$5,200. The last one did not go quite so high, but it is expected that the two cars now belding sampled will show 400 ounces in silver per ton besides other values. Mr. diver per ton besides other values. Knight says the two cars will in all probability net him between \$8,000 and The shipment contains much norn silver, which materially increases the average.

ORE IN MYSTIC SHRINE.

Small Streak Encountered in West Fissure of this Bingham Group. Manager E. W. Young of the Mystic Shrine property at Bingham reports encouraging news from that group. The management has run a tunnel south, it is said, on the Red Wing vein for about 256 feet, when the drift was irned to the west and at a distance 250 feet the west fissure was struck

of 250 feet the west fissure was struck and a streak of ore encountered which shows as much as 18 ounces silver, 39 per cent lead and \$3.00 in gold per ton. Another assay showed 1½ per cent copper, 17 ounces silver, 45 per cent lead and \$2.40 in gold. The strike was made last week and while it is not a big one it is quite encouraging to the company, which has six men employed in drifting on the vein.

Mr. Young reports very good milling

Mr. Young reports very good milling ore being extracted both from the Red Wing and the Red Wing Extension.

#### AT THE RISING SUN.

No Ore Has Yet Been Encountered in the Tunnel but Work Will Go On.

Jesse Knight of Provo has spent a great deal of money in the development of the Rising Sun property in Tintic, has been entered and no ore found, he teels encouraged to pursue the 2,000 feet and a vertical depth of about 800 feet has been secured. When the vein was intercepted a drift was run for something like 100 feet. So far this has not exposed the coveted ore body, but Mr. Knight thinks they are not under the fine showing near the blow out on the surface. Prospecting will still be pushed and if after a time no ore appears cross cutting will begin, as it is possible the main vein may not yet have been encountered. At the Black Jack and Trail a new

compressor is being put in and sinking is still going on.

WAKE-UP-JIM GROUP. Good Report on the Property Which is Bonded to Salt Lakers.

The Delta, Idaho, correspondent of the Spokane Review says that work on the wagon road to the Wake-Up-Jim group has been completed, and a new boarding house is to be built right away, the intention being to put on three shifts as soon as accommodations are provided for them. In the meantime two tunnels are being pushed, a crosscut on the Wake-Up-Jim and a drift on the vein in the Char-The crosscut is supposed to be within a few feet of the vein.

The property is under bond to Salt
Lake parties, the three Ward brothers

and Thomas Shuster being the owners. The Charleston tunnel has been run 150 freet on the vein, showing very high grade ore all the way. It ranges from \$60 to \$100 per ton, while the vein has been from ten inches to three feet in width. In an old short tunnel on the Wake-Up-Jim the same conditions were found. The two tunnels have their portals almost together and run in either direction from Trail Guich. Several years ago there was a milling test of ten tons of Charleston and five of Wake-Up-Jim ore put through the Golden King mill, below Murray, the whole lof yielding about \$60 per ton in free gold, and there have been hundreds

of dollars taken out in specimen pieces.
All this was taken from near the surface, where the gold is freer than it
is at greater depth, and the ore in the face of the Charleston drift now seldom shows free gold to the naked eye, although rock crushed in a mortar and panned almost invariably shows colors. panned almost invariants.

It is full, however, of sulphates of iron, in which form most of the quartz gold of the Coeur d'Alenes is found. The intention is to open up the mine exten-

Intention is to open up the mine extensively and put up a mill after there is ore enough in sight to justify the expense, avoiding the mistake which has been made a number of times in the Ceour d'Alenes of building a mill with no mine to supply it with ore.

This group is located at the very head of Trail Gulch, from which came the heaviest gold ever found in the Coeur d'Alenes, and the mountain is so steen that there is almost no limit to steep that there is almost no limit to the depth which can be obtained by unnels. The present tunnel sites are 700 feet below where the ledge crosses the ridge on either side, while they are as much more above where the gulch begins to flatten out and become too level for tunneling.

NOME ITEMS.

E. S. Hubbard Believes Those Who Stay Will Make Money.

W. E. Hubbard received a letter yes-terday from his brother, E. S. Hubbard, in which the writer said he expected to remain at Nome until October. Of the party who went with Mr. Hubbard two were Oakland, Cal., men, the others being W. B. Slawson and Dr. E. W. Whitnev of this city. Dr. Whitney went prepared to attend to all who needed a doctor's attention, while the rest of the party were prepared to use picks when necessary. Mr. Hubbard says his friend Slawson wants to stay all winter. Smallpox has broken out in Nome, but their camp, about five miles from Nome, is free from the disease. A great deal of the beach is said to be unprofitable,

and a great many are leaving, but Mr. Hubbard sees money in for those who

> VERY RICH STRIKE. Streak of Bismuth Silver Ore Yields

3,000 Ounces in Silver Per Ton. The recent strike in the Bobtail mine The recent strike in the Bottan inne-or Red Mountain district, Ouray coun-ty, has proved to be of the greatest importance and has given the nine a high standing among the shipping prop-erties of Ouray county, says the Denver Mining World. The mine is owned by the Barstow Mining and Milling com-any which have been studily developpany, which has been steadily develop-ing the property for several years. Charles Newman, who is operating the Mono group in the vicinity, says that the ore body has been shown to be con-tinuous and that the shipments will hereafter average about a curloud a hereafter average about a carload a day, the ore being packed to Red Mountain and from thence shipped to Durango by rail. It is seldom that such rand progress of the seldom that such rand progress. rapid progress is made in the opening of a mine. The strike was made less than four weeks ago, and since then work on the ore body has been continuous and has proved the permanence of the vein. The present work is done with a force of 20 men, including top men and ore sorters, the average taken out being a ton a day per man. As development progresses, more men will be employed, and at the present rate of progress it is believed that be-fore the close of the season the ship-ments will be increased to not less than 90 tons a day. The mass of the ore body is of low grade, but there is a streak of bismuth silver ore about eight inches wide running through the vein which yields from 2,000 to 3,000 ounces of sil-ver to the ton. Last week a carload of ore was taken out by two men in a day and a half.

Boise Assay Business.

The value of the regular deposits of gold and silver at the U. S. assay office at Boise, for the fiscal year ended June 30, 1960, was \$1,963,873.71, a gain over the preceding year of \$399,174.98, says the Boise Statesman.

To this amount may be added the value of the small lots of bullion of a value of less than \$100 each, \$117,915,76, making a total for the year of \$2,081,-Following is a statement showing the clume of business, the regular de-

Vernal Mining Notes.

Mr. Sawyer, the manager of the Dyer minue, and a party of miners came down Monday, says the Vernal Ex-press. They repaired the telephone line as they came down. Manager Sawyer says that they have everything ready to start the smelter as soon as they can secure the services of an experienced smelter man. He is now corresponding with several parties and will doubtless have a man to take charge of the smel-ter in a short time. It is their intention to make a continuous run when the start is made, if it is possible to do

Henry A. Woodruff and wife are in He reports that he has made a new strike in one of Mr. Hacking's claims, but he refused to give further informa-tion regarding it. Mr. Woodruff ex-pects to leave for Canada in the near

### Chainman Copper Ore.

Close on the heels of the gold strike which was made in the Chainman mine about three weeks ago comes another which promises to eclipse in importance anything before discovered in that mine or in the camp. In the new west drift, 200 feet below the surface, a body of copper pyrites was encountered on Tuesday morning. On account of bad air, the work of opening it up is slow, but yesterday afternoon it had been stripped for ten feet and a drill hole two and one-half feet in depth was still in the ore. An assay of the drill-ings from the bottom of the hole, showed 9 per cent copper, \$4 in gold and six ounces of silver per ton, values which would be considered magnificent in any copper camp in the country. The copper lies on the north side of the gold ore, of which it forms one wall.—White Pine News.

### MINING NOTES.

Alex Tarbet arrived in Butte on mining business last Sunday. The Conklin samper reported four

cars of ore from Tintic today. The Taylor-Brunton sampler reported a car of ore from Nevada today. The 11/2 cent assessment of the Ely Mining company became delinquent to-

The Bullion-Beck of Eureka reached the market today with another 4-car lot B. F. Woodward has resigned the management of the Joe Bowers Exten-sion at Diamond.

Treasurer George H. Dern and Di-rector John Heimrich of the Mercur

went out to the mine today. The Nevada Mining company operating at Galena, Nevada, was on the mar-ket today with a car of ore.

The Le Roi mine at Rossland, B. C. shipped 4,680 tons of ore last week. The shipments of the camp are said to be increasing again.

A. W. McCune is back from his trip to the Watseka mine, in Madison county, Mont., and reports the preperty showing up splendidly.

Mr. Garn, who leased the Third Term property recently, is still driving ahead in blue lime. He expects to have to go about 200 feet before the vein is inter-

A. Lochwitz is down from Park valley and reports very encouraging conditions at the Century mine in that district. The new mill will be running shortly and the camp shows more activity than A force of surveyers are at present

engaged at the new sinciter site in pre-paring a topographical map of the ground, after which the exact spot upon which the smelter will be built will be decided upon. At the annual meeting of the Eutonia

Mining compared held yesterday the following officers were elected: John Eckman, president: William Keating, vice president, and L. D. Young, secretary. These, with J. T. Mulloy and E. C. O'Dornell comprises the directorate G. O'Donnell comprise the directorate The directors of the Joe Bowers Extension at Diamond have issued a fin-ancial statement, which shows that the liabilities of the company amount to \$4,983.06. Of this amount \$1,200 is an overdraft. The remainder is due on wages for May and June, and for sup-

plies delivered at the mine. The com-

pany's property, consisting of seven locations, is valued at \$60,000.

## MARKET DULL AND NARROW

American Securities in London Show Strength in Disregard of General Depression.

Indifference to Weakness in Grook, lyn Transit-Wild Movements in Stocks Usually Inactive.

New York, July 17.-American securties in London showed the same kind of strength in disregard of the general depression as they did yesterday, and railroad stocks here opened a fraction

higher in sympathy. The general market showed the same indifference to weakness in Brooklyn Transit as yesterday. Union Pacific and B. and O. maintained their prominence, but their extreme rise was lest than a point. Otherwise the market wa dull and narrow. A rise of 2% in Pacifi Mail was due to the expectation of advantage from the movement of troops to China. Prices yielded a large fraction before 11 o'clock. A spurt of over 3 points in Brooklyn Transit produced no noteworthy effect on the general market. There were some wild movements in usually inactive stocks, including a tree of 112 to Illinois Central 2 in New rise of 1¼ in Illinois Central, 2 in New York Air Brake and a loss of 1½ in American Tin plate. Sugar was almost inactive until near noon, when it ad-

New Discovery By The Misses Bell

A Trial Treatment FREE To Any One Afflicted With Hair on Face, Neck or Arms

We have at last made the discovery which has buffled chemists and all others for centuries-that of absolutely destroy for enturies—that of absolutely destroying superflows halt, root and branch,
entirely and permanently, and that too
without impairing in any way the finest
or most sensitive skin. It is scarcely
possible to overstate the importance of
this discovery, or the great good and satisfaction it will be to those afflicted with
one of the most disfiguring and aggravating blemishes—that of superfluous bair on
the face of women, whether it be a mustache or growth on the neck, checks or
arms.

tache or growth on the neck, cheeks or arms.

The Misses Bell have thoroughly tested its efficacy and are desirous that the full merits of their treatment to which they have given the descriptive name of "KILL-ALL-HAIR" shall be known to all afflicted. To this end a trial will be sent free of charges, to any lady who will write for it. Without a cent of cost you can see for yourselves what the discovery is; the evidence of your own senses will there convince you that the treatment "KILL ALL-HAIR." will rid you of one of the greatest drawbacks to perfect lovelines the growth of superfluous hair on the facor neck of women.

r neck of women. Please understand that a personal demon stration of our treatment costs you nothing. A trial will be sent you free, which you can use yourself and prove our claims by addressing

PERFECT DINING CAR SERVICE Sieeping Cars to Chicago Without Change. Ticket Office, 103 West Second South, Postoffice Corner.

Our cars are no petter-in themselves -than the cars of other lines. It is what is INSIDE them that makes them more comfortable

For instance: The seats in our reclining-chair cars are provided with linen head pieces-clean and cool. Our dining-cars have electric fans, and are gor-geously decorated with flowers. In every car is a thermometer, which the porter constantly consults in order to keep the temperature of his car as near-

ly uniform as possible.

By themselves, these tnings are trifles, but the sum total of them goes a long way toward making a trip over the Burlington a mighty enjoyable experi-Burlington trains leave Denver 4.00 and 10.00 p. m. for Omaha, Kansas City, St. Louis, and Chicago,
